EXPERIENCE

AI Engineer

Jan 2025 – Present

Covariance, Athens, Greece

- Built real-time ML applications including RAG-powered assistants and fraud detection models with low-latency inference
- Fine-tuned large language models on AWS SageMaker for an Amazon-funded project, integrating solutions into production via FastAPI
- Guided architectural decisions and system design across projects while leading a team of 4 data scientists in Agile sprints
- Enhanced ML workflows with Git, DVC-based data versioning, and automated pre-commit checks for reproducibility
- Mentored junior scientists through active code reviews, PR guidance, and knowledge sharing

Research Fellow

Mar 2024 – Present

University of Thessaly, EU NextGen-EU

- Designed NLP and multimodal pipelines integrating biomedical and imaging data for predictive precision medicine
- Developed computer vision models for MRI image classification and segmentation, supporting healthcare initiatives
- Collaborated with clinical stakeholders on national projects, aligning AI solutions with patient outcomes and research priorities

Senior Data Scientist

Feb 2024 – Jan 2025

Covariance, Athens, Greece

- Delivered end-to-end ML lifecycle projects, from problem definition and data preparation to deployment and monitoring
- Applied time series forecasting and change point detection for predictive resource allocation and risk analysis
- Built anomaly detection pipelines (e.g., PCA-based outlier analysis) supporting reliability modeling and fault prevention
- Aligned ML solutions with business priorities, including fraud prevention and operational efficiency

EDUCATION

PhD in Artificial Intelligence, University of Thessaly, Greece

Expected Feb 2026

Thesis: Deep Learning Methods for Big Data with Applications in NLP

MSc in Informatics and Computational Biomedicine, University of Thessaly, Greece

2020

BSc in Computer Science and Biomedical Informatics, University of Thessaly, Greece

2019

SKILLS

Programming: Python, SQL, R, MATLAB

Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Transformers

AI/ML: Deep Learning, NLP, LLMs, RAG, Computer Vision, Forecasting, Anomaly Detection

MLOps & Cloud: AWS SageMaker, Azure, MLflow, DVC, Git, FastAPI

Data Science: Predictive Modeling, Statistical Modeling, Ensemble Methods, End-to-End ML Lifecycle

Workflow: Agile (Scrum), Workflow Optimization, System Design, Technical Leadership

Visualization: Matplotlib, Seaborn, Plotly, Power BI
