EXPERIENCE

Covariance 2021 – Present
Athens, Greece

AI Engineer 2025 – Present

- Built real-time ML applications including RAG-powered assistants and fraud detection models with low-latency inference
- Fine-tuned large language models on AWS SageMaker for an Amazon-funded project and deployed solutions with FastAPI
- Guided architectural decisions and system design across projects while leading a team of 4 data scientists
- Improved workflow reproducibility with Git, DVC-based data versioning, and automated pre-commit checks
- Mentored junior scientists through code reviews, PR guidance, and structured knowledge sharing

Data Scientist 2021 – 2025

- Delivered end-to-end ML lifecycle projects from problem definition and data preparation to deployment and monitoring
- Applied time series forecasting and change point detection for predictive resource allocation and risk analysis
- Built anomaly detection pipelines such as PCA-based outlier analysis for reliability modeling and fault prevention
- Aligned ML solutions with business priorities including fraud prevention and operational efficiency

Research Fellow Mar 2024 – Present
University of Thessaly, EU NextGen-EU

- Designed NLP and multimodal pipelines integrating biomedical and imaging data for predictive precision medicine
- Developed computer vision models for MRI image classification and segmentation supporting national healthcare initiatives
- Collaborated with clinical partners to align AI solutions with patient outcomes and research priorities

EDUCATION

PhD in Artificial Intelligence, University of Thessaly, Greece Expected Feb 2026

Thesis: Deep Learning Methods for Big Data with Applications in NLP

MSc in Informatics and Computational Biomedicine, University of Thessaly, Greece 2020

BSc in Computer Science and Biomedical Informatics, University of Thessaly, Greece 2019

SKILLS

Programming: Python, SQL, R, MATLAB

Frameworks: PyTorch, TensorFlow, Keras, Scikit-learn, Transformers

AI/ML: Deep Learning, NLP, LLMs, RAG, Computer Vision, Forecasting, Anomaly Detection

MLOps & Cloud: AWS SageMaker, Azure, MLflow, DVC, Git, FastAPI

Data Science: Predictive Modeling, Statistical Modeling, Ensemble Methods, End-to-End ML Lifecycle

Workflow: Agile (Scrum), Workflow Optimization, System Design, Technical Leadership

Visualization: Matplotlib, Seaborn, Plotly, Power BI
